

Read before typing:

- Answer all the questions using JOIN.
- You must keep question-wise query and results in a text file.

1. Find cities which have 'netbanking' facility.
2. Find account numbers that do not use 'netbanking'.
3. List all Customers who have a loan at branch at 'zone 2'.
4. Find the set of LOAN numbers in the form (ln1, ln2, amount) for which the amount is same and in the range 2000000 and 8000000.
5. Display the total amount of payment made in every month. Your results should display month in word (Eg. JANUARY, FEBRUARY ...) and the total amount paid in that month.
